Ignite Fall Gathering 10/22

The Ignite Fall Gathering was an outreach for parents to get to know Ignite Leadership! Food and fellowship was enjoyed and ministry leaders were able to share their hearts for ministry. The heart of Ignite will always be rooted in God's word. Teaching and discipling your children using God's word and building relationships rooted in the love of Christ. The gathering was held at Maureen Jenkins house and kids were able to hike and play in her vast acreage!

Patti Height Biblical Discussion on Gender Identity 10/27

Patti Height led a great discussion for both teens and parents on the weekend of the 27th. Patti shared her testimony, shed light on how to evangelize to the LGBTQ+ community and how to stand up for truth in their generation. She also hosted a Q and A and fielded many important questions from our teens. Patti's testimony really spoke to me when she shed light on what exactly happened in her life to make her so confused and put a misplaced faith in a gay lifestyle as well as the LGBTQ+ community. Patti also has an amazing testimony of God's grace breaking the boundaries and penetrating her and her partner's heart! Attached are the adults and teens videos!

The Forge 10/29

At the latest Forge meeting the boys discussed evolutionary theory and played some flag football. SHOUT OUT TO THE FLYING 9er's for getting the win! Children also enjoyed delicious chili provided by John Clayton! At the Forge, kids and leaders discussed evolution and the age of the Earth. Students also analyzed the scientific method and evaluated why evolution and the Old Earth theories are taught as undisputed scientific fact. The boys had great questions and held great conversations on the topic! Kids were very engaged and interested in this topic! Here are some resources to help you lead discussions in the home as well!

The Flying 9er's!

Soul Sister 10/29

At our monthly girls discipleship meeting the girls also discussed evolution and compared micro and macro evolution. Karina hosted the girls in her home and led the discussion. Scientists claim continuous mutations within species leads to a complete change from one species to another. Yet again, scientists are met with the scientific method preventing these theories from being facts and yet they are still taught as indisputable facts. The questions asked always have to revolve around why and as Christians we know that man has forsaken God's truth and given it up for a lie. The girls made apple roses to compare micro and macro evolution. Though the apple desserts change while being baked, the apples stay apples and do not transform into another fruit!

Below is a recipe for the delicious apple roses!
